

## IGBT - DUAL - DRIVER - INTERFACE - CARD

### P/N IFC-MB-22-IG2 (up to 2200V applications)

IFC suits best Mitsubishi CM400DY-66H  
 and Chopper IGBT's of other manufacturers

powered by TWO remote IGBT-Driver-Cores as HV2-30I or HV2HHS-30I  
 connected via 2,3kV HV-isolated wires and matching connecting system

meet: EN 50178; EN 50124-1 & 2; EN 61800-5-1  
 uncompromised creepage & clearance of more than 22mm

**Features:**

- polar Rg networks for easy modeling HARD /SOFT
- active clamp circuit
- allover height <10,5 mm
